The one-stop-shop solution

Quikfix is renowned for its superior range of technologically-advanced products and superlative services.

Taken together they provide a fully-integrated solution for Road Authorities wishing to achieve total highway maintenance quickly and efficiently.

Quikfix RoadCare offers a turnkey service which can include pothole repair, lining replacement and the installation of signs and safety devices—all as part of a single contract with works completed at the same time.

Of course, all these products and services are available individually and can be contracted at any time, including the finishing of new roads and surfaces carried out by other contractors.

Our territorial companies will be delighted to quote for your needs and introduce you to the many benefits of Quikfix and our RoadCare service.

Quikfix RoadCare

Integrated Renewal

Gone are the days when roads were repaired and then you waited weeks or months for different contractors to reinstate the road lining, install safety devices and fit news signs.

Quikfix RoadCare is a one-stop-shop where a single contract does it all in the only way we know how—*quickly, efficiently, cost-effectively and with the work guaranteed for 5 years!*

The process of tendering, awarding, supervising and paying several contractors to carry out complete road refurbishment is time-consuming, expensive and unnecessary! The works themselves will be done at different times by different crews causing greater risk of accidents and prolonged disruption for road users.

The solution lies in a single contractor undertaking all the work at the same time. However, finding one company with the equipment, expert manpower and ability to do everything is nigh impossible—until now! **Quikfix RoadCare** delivers fully-integrated, turnkey products and services as part of just one contract.

Our **Instant Road Repair** is the best in the world, there's simply nothing faster for repairing potholes and road degradation permanently in all weathers and without the need for road closures. Repairs are fully guaranteed using our unique Repair Identification System.

Quikfix RoadLine uses modern machinery and cold-lay or thermoplastic paints to apply road markings in virtually any colour. You could also make money from your roads at the same time by having our **Quikfix RoadMark** service apply advertisements to the road surface in safe, high-traffic locations.

The installation of road cameras, catseye reflective studs and other safety devices is undertaken by **Quikfix RoadSafe**.

And, finally, new informational and directional signs can be designed, manufactured and erected by **Quikfix RoadSign** as part of the integrated, co-ordinated works programme. Job done!

Quikfix RoadCare is the 21st Century way of maintaining your road network.

It's economical, fast, reliable and guaranteed!

Ask "*the one for the road*" to quote the next time you require complete, joined-up road refurbishment.
